Phrases from AOD Engaging Stakeholders & Building Capacity Vision Meeting:

- Reduce the secondary negative effects of substance abuse
- Members of the UConn community will have freedom from the dependency of AOD
- A lifetime strategy for optimal health
- Culture that promotes safety, health, and wellness
- Student-led programs/education – cultural change to include education led by students
- Core idea – we have a community of students who value and cherish themselves in a healthy and sustainable way
  - Re-center the culture into a place where students feel that being open (open conversation; vulnerabilities) is prioritized over consequences
- Being accountable for yourself and your fellow students
- Create a culture in which students have each other’s best interests in mind when it comes to health and wellness
- Harnessing campus resources/cultivate relationships knowing that this is good for the entire community – unified approach
- Environment – students have to feel that there is a supportive environment that promotes their own self-awareness
- Campus value – a culture of caring – students are looking out for each other, faculty & staff are looking out for students

- Decision making/navigating (mission or vision)
- A thriving unified campus community that supports the health and wellbeing of all members
- A connected unified campus community that supports the health and wellbeing of all members
- A thriving, connected campus community that supports the health and wellbeing of all
  - A thriving, connected campus community that supports the full potential of our students.
